- Weather
- Streaming & video
- Getting help
- Commands

First join

- The first time you join, a short **server guide** shows before you pick a character. Open it again any time with `/guide` or **M › Server Guide**.
- **Create a character**: name, date of birth, nationality. New characters usually open the appearance editor so you can dress them.
- **Pick where to spawn** from the spawn screen: city locations, your last location, or one of your homes once you own one.
- Change character later with **M › Switch Character** or `/logout`.

> **Every server is set up differently.** Owners can rename things, change keys, turn features off or limit them to certain jobs. If something here is missing on your server, it has been switched off.

Keys

Change any of these in **GTA Settings › Key Bindings › FiveM** (the names start with **Fusion**). Prompts on screen always show the key you picked.

`M`	Main menu	`1` – `5`	Use hotbar slot 1 to 5
`I`	Inventory		

`E`	Interact: stores, garages, ATMs, pumps, doors, check-in
`G`	Second option: boss menu, buy a jerry can
`X`	Cancel what you're doing
`L`	Lock or unlock your vehicle
`B`	Seatbelt
`Left Alt`	Hold for third eye (look, then click an option)

`F1`	Phone
`F11`	Voice range: whisper, normal, shout
`Caps Lock`	Hold to talk on the radio; tap for the mouse in menus
`TAB`	Weapon wheel (if your server uses Fusion's)
`V`	Camera view (first person shows the windshield HUD)

In menus

`↑` `↓` move, `←` `→` change a value, `Enter` select, `Backspace` back, `Esc` close. You can keep walking and driving with a menu open.

The menu

Press `M`. What you see depends on your job and what the server allows. The usual entries:

ENTRY	WHAT'S IN IT
Player Options	Your character and appearance options the server allows
Vehicle Options	Doors, windows, engine, seats, extras, liveries and more, while you're in a vehicle
Weapons	Weapon loadouts, attachments and tints, on servers that allow them
Job	Go on or off duty, the job center, and the boss menu for bosses
Radio	Join a radio channel
My Home	Storage, wardrobe, visitors, keys and selling, once you own a home

ENTRY	WHAT'S IN IT
Emergency	Siren, radar and PIT tools for police, fire and EMS
Streaming & Video	Streamer mode, video mode, free camera and the recorder
Misc Settings	HUD layout, speedometer style, windshield HUD, show location and more
Help & Reports	Call an admin, report a player, ask a question
Switch Character	Back to the character screen

Your HUD

- On foot you see your server ID, cash, bank, job and status. In a vehicle you also get speed, gear, fuel, seatbelt, lock, street, compass and postal code.
- **Move it:** `/hud` or **M › Misc Settings › Edit HUD Layout**. Drag anything where you want it, right-click to hide it, **Reset** to start over. Your layout is saved.
- **Speedometer style:** Classic, Analog dial, Digital, Sport or Minimal in **M › Misc Settings › Speedometer** (if the server lets players choose).
- **Windshield HUD:** drive in first person (`V`) and your speed, gear, signals and warnings show low on the windshield. Turn it off in **M › Misc Settings**.

Money

- You have **cash** and a **bank** account. Check them with `/cash` and `/bank`, or on the HUD.
- Use any **bank or ATM** with `E` to deposit, withdraw and transfer.
- Send money to another player's phone number in the phone's **Bank** app.
- Jobs pay a **paycheck** every so often while you're on duty.

Inventory

- `I` opens it. Drag items to move them, **right-click** to use one, and drop items on **Use**, **Give** or **Drop**. Type an amount to split a stack.
- The first five slots are your **hotbar**: `1` – `5` uses them.
- At a car's boot, `I` opens the **trunk**. Inside a car, it opens the **glovebox**.

- Food and drinks keep your hunger and thirst up. You can only carry so much weight.
- **Third eye:** hold `Left Alt` and look at a person, car or object to see what you can do with it, then click.

Vehicles

- `L` locks and unlocks a car you have keys for. Give keys to a friend in **M › Vehicle Options**.
- **Wear your seatbelt** (`B`). Without it, a hard crash throws you through the windscreen, and the faster you were going, the more it hurts. You can't get out while you're buckled.
- **Garages:** at a garage marker press `E`: in a car to park it, on foot to take one out. Cars left out may go to the **impound** after a restart; getting them back costs a fee.
- **Fuel:** pull up to a pump and press `E`. Press `G` there to buy a jerry can. Electric cars charge at chargers.
- **Weather matters:** rain makes the roads slippery, snow and ice more so, and deep water makes you aquaplane. The HUD says *Wet roads*, *Snow on roads* or *Icy roads*.

Phone

`F1` opens it (or use the **phone** item). Every character has their own number.

Phone Call players; the call connects with voice	**Messages** Text conversations with unread counts	**Contacts** Save numbers, call or text in one tap
911 Call or text emergency services; they get your postal and a map marker	**Bank** Your balances, and send money to a number	**Alerts** Every emergency and AMBER alert you received
Weather Now, what's coming next, and storm warnings	**Web** The server's links: Discord, rules, store	**Settings** Your number, wallpaper, AMBER alerts on or off

Voice & radio

- Talk with your normal push-to-talk key (**GTA Settings › Voice Chat**).

- `F11` switches between whisper, normal and shout. A circle shows how far you carry.
- **Radio: M › Radio** or `/radio 12` to join channel 12, `/radio 0` to turn it off. Hold `Caps Lock` to talk; everyone on the channel hears you anywhere on the map. Low channels are often reserved for police and EMS.
- Phone calls are heard clearly from anywhere.

Homes

- A **green marker** at a door means something is for sale. Press `E` to **Look inside**, then **Buy**. Apartment buildings have one apartment per player; a house has one owner.
- At your door: **Go inside** and **Lock / Unlock**. In apartment buildings, **Residents** lets you ring someone's doorbell; they let you in from **M › My Home**.
- **M › My Home**: storage, wardrobe, visitors, waypoints, **Give a key**, take keys back, and **Sell**.
- **Your garage:** every home can have one. Park and take out your cars there; key holders can use it too, and each person only sees their own cars.
- **Leaving:** at any exit (front door, balcony, back door) pick where you come out: any entrance of the home, or straight to its garage.
- Your homes appear on the spawn screen, so you can start the day at home. Log off inside and you come back outside the door.

Jobs

- **M › Job** (or `/duty`) puts you on or off duty. You're paid while on duty.
- The **job center** in **M › Job** lists jobs you can take yourself. Others are given by a boss.
- Bosses get a **boss menu** (**M › Job**, or `G` at the duty point): hire, promote, demote, fire and manage the company's money.
- `/job` shows your job and rank.

Police, fire & EMS

`Q`	Emergency lights on or off
`R`	Siren on or off
`Y`	Next siren tone
`E` hold	Air horn
`F6`	Use the siren controller and radar remote with the mouse
`F5`	Radar power (police)
`Num 8` `Num 5`	Lock front / rear speed

`Num 9` `Num 6`	Lock front / rear plate	`Num 0`	Start or reset the PIT timer

- Each service has its own tones: police wail, yelp and priority; EMS hi-lo and phaser; fire the mechanical wail.
- The **PIT timer** counts the pursuit and turns green with **PIT AUTHORIZED** when your department allows it. Your department's command sets the rules.
- **M › Emergency** has the speed alarm, **Run plate** and the BOLO list. The plate reader beeps when it sees a BOLO plate.

Getting hurt

- Depending on the server, you either **respawn** at a hospital after a short timer, or go **down** and wait for EMS to revive you before a timer runs out.
- Call EMS from the phone's **911** app. On-duty EMS get your location.
- No EMS around? Use the **hospital check-in** desk (`E`) for treatment, for a fee.
- Bleeding out usually costs a hospital bill, and some servers take items.

Weather

- The weather changes through the day, and the phone's **Weather** app shows what's coming.
- **Severe weather** (thunderstorm, flood, hurricane, tornado, blizzard) comes with a warning banner and a countdown. Outdoor sirens sound for tornadoes and hurricanes.
- Floods raise the water, tornadoes pick up cars and people, and lightning can hurt you on foot. Get indoors or drive away from the danger zone on the map.

Streaming & video

- **Streamer mode** (`/streamer`) hides what you choose from your screen: chat, names and IDs, money, location, minimap, phone numbers and more.
- **Video mode** (`/videomode`) clears the screen for filming, with letterbox bars, colour filters and slow motion.
- **Free camera** (`/freecam`): fly the camera near your character. Save shot A and shot B and play a smooth move between them.
- **Recorder** (`/record`): records just the game picture, without your HUD or menus. Clips appear in **My Clips** (`/clips`), where you can play, trim, add slow motion, join clips and download them. Clips have no sound.

Getting help

- **M › Help & Reports**: ask for an admin, report a player, or send a question or bug report. Staff can see your location and claim your request.
- Quick versions: `/calladmin <reason>` and `/report <message>`.
- Stuck in a menu? `Esc` closes it, `X` cancels an action.

Commands

COMMAND	WHAT IT DOES
`/guide`	Open the server guide
`/hud`	Move or hide parts of your HUD
`/calladmin`, `/report`	Ask staff for help
`/duty`, `/job`	Go on or off duty, see your job
`/cash`, `/bank`	Your money
`/radio 12`	Join a radio channel (`/radio 0` leaves)
`/postal 1234`	Waypoint to a postal code (`/postal` clears it)
`/wheel`	Weapon wheel
`/streamer`, `/videomode`, `/freecam`	Streaming and filming tools
`/record`, `/clips`	Start or stop recording, open My Clips
`/logout`	Back to character selection
